Java -> Editor -> Save Actions (手动)

- Format all source code
- Organize imports
- Additional actions

  ○ Code Style

    ▪ Use blocks in if/while/xxxx : Always
    ▪ Convert for loop to enhanced
    ▪ use parentheses in expressions : Always
    ▪ Use modifier final where possible : unchecked

  ○ Unnecessary code

    ▪ Remove unused imports: checked

XML->XML Files->Editor (手动)

- Line wrap : 120

Java -> Code Style -> Fommatter (EPF导入)

Indentation

- Indent *# uncheck Statements within 'switch' body

White Space

- Before opening brace : check Array Initializer
- After opening brace : checked
- Before closing brace : checked
- Before Colon: *# uncheck label* # uncheck switch

Blank lines

- Black lines in comlilation unit: *# After package declaration: 1* # Before import declaration 1 *# After import groups: 1* # Between class declarations: 1

- Blank lines within class declarations: *# Before declarations of the same kind: 1* # Before member class declarations: 1 *# Before method declarations: 1

New lines:

- Empty statements *# Put empty statement on new line : checked

Line Wrapping

- Maximum line width: 80 -> 120
- A bit more... not list here
- Indentation policy: Default indentation

Comments

- General settings *# Never join lines: checked
- Javadoc comment settings *# New line after @param tags : unchecked
- Line width *# Maximum line width for comments: 80 -> 120

Off/on Tags

- Enable Off/on Tags: checked

Java -> Code Style -> Clean up (EPF导入)

Code Organizing

- Formatter

  - Format source code : checked

- Import

  - Organize import : checked

Code Style

- Use blocks in if/while/xxxx : Always
- Convert for loop to enhanced

Expressions

- use parentheses in expressions : Always

Member access

- uncheck all

Missing code

- Add serial version Id : check genenrated

Java -> Code Style -> Organize Imports (手动)

- Number of static imports needed of * : 1

Warning Java-> Compiler -> Errors/Warning (可选设置，看个人习惯)

- Code Style，选Parameter Assignment/Undocument empty block
- Potential programming problems，选Possible boolean assignment/Empty Statement/Unused object -alllocation/ Switch case fall through/ Missing synchronizied modifier on inherited method / Class override equals not hashcode
- Name shadowing and conflicts, 全选剩下的两项。
- Unnessary Code, 选Value of parameter is not use / Unnecessary cast or instanceof
- Generic Type，全部取消。
- Null analysis, 选potential null access/redudant null check
